Portfolio:

CAREER OBJECTIVE

Dedicated and motivated Software Engineering student looking for an internship to apply academic knowledge to real-world challenges. Having a strong foundation in full-stack development, algorithm design, and software architecture. Eager to be involved in the entire software development lifecycle (SDLC). Committed to gaining hands-on experience in cooperative, professional environment while improving coding skills. Passionate about developing reliable software that delivers meaningful results.

EDUCATION

Universiti Malaysia Terengganu

Kuala Nerus, Terengganu

Bachelor of Computer Science (Software Engineering) With Honours

October 2023 - March 2027

- CGPA: 3.48 / 4.00
- Malaysian University English Test (MUET): Band 4.0
- Relevant Coursework: Machine Learning, Web Application, Quality Assurance, Internet of Things (IOT), Database, Data Structure and Algorithm, Software Requirements Engineering, Software Testing, Networking, Cybersecurity

Universiti Malaysia Terengganu

STEM Foundation

Kuala Nerus, Terengganu

Universiti Malaysia Terengganu

July 2022 - July 2023

- CGPA: 3.50 / 4.00

ACADEMIC PROJECTS

MySewa: House Rental System for Students (Final Year Project)

July 2026

Tech Stack: HTML/CSS/JS Spring Boot, JWT, React, Vite, MySQL, Docker, ToyyibPay

- Developed a full-stack rental platform connecting students and landlords near campus, featuring user authentication, property listings with search/filtering, rental applications with status tracking, reviews, and admin dashboard.
- Integrated ToyyibPay sandbox for payment processing (billing, callbacks) with transaction persistence.
- Built using Spring Boot REST API with JWT security, React 19 frontend (Vite), MySQL 8 database, and Docker Compose for local full-stack deployment.

PulseOn: Wind Direction and Environmental Monitoring System

January 2026

Tech Stack: HTML/CSS/JS, MicroPython, ThingSpeak

Hardware: Raspberry Pi Pico, GPIO, I2C LCD, DHT22

- Developed an IoT wind vane prototype using Raspberry Pi Pico and MicroPython to read four digital sensors and decode 16-point compass directions with direction history tracking.
- Integrated I2C LCD display for real-time feedback, optional DHT22 sensor for environmental temperature/humidity readings, and ThingSpeak cloud platform for remote data monitoring and logging.
- Built a complete embedded IoT solution combining multi-sensor input, signal decoding, display output, and cloud telemetry on resource-constrained hardware.

Test DobiDemo System

July 2025

Tech Stack: Selenium IDE

- Developed Selenium IDE automation scripts (.side files) for regression testing covering customer, supplier, sales, and expense workflows against a demo web application.

- Created formal test documentation including a Software Test Plan and Test Summary Reports as part of a university software testing module and Demonstrated end-to-end testing process: planning, scripted UI automation, evidence collection, and reporting.

MovieExplore: Movie Platform API

June 2025

Tech Stack: HTML/CSS/JS, Node.js, Express, MySQL, JWT, REST API, Axios

- Developed a modular REST API using Express.js with JWT authentication, MySQL database, and external movie metadata integration via Axios.
- Implemented feature modules for user management, movie data retrieval, and watchlist functionality with input validation using express-validator and password hashing for security.
- Created a minimal static frontend client to consume the API, demonstrating end-to-end authenticated REST service consumption.

EXTRA CURRICULAR ACTIVITIES

Empowering Future IT Professionals

Cyberjaya, Selangor

- Participated in an industry session with Finexus Group to explore high-demand technology roles and gain practical insights into transitioning from academia to the professional IT sector.

December 2024

Universiti Malaysia Terengganu (UMT)

Kuala Nerus, Terengganu

- Sukan Antara Fakulti (SAF25), Gegarmaskk 2025.
- Sukan Antara Fakulti (SAF24).

May 2024 - June 2025

Universiti Sultan Zainal Abidin (UniSZA)

- MLBB Vice Chancellor Cup 2024 (UNISZA).

International Islamic University Malaysia (IIUM)

Gambang, Pahang

- Sukan Asasi Malaysia (SAM23).

March 2023

HONORS & AWARDS

- Dean's List — Semesters 4 and 5 (undergraduate).
- Dean's List — STEM Foundation Programme.
- Gold medalist — Gegarmaskk 2025 (MLBB), SAF24 (MLBB), MLBB Vice Chancellor Cup 2024 (MLBB).
- Runner-up — Sukan Antara Fakulti 2025 (SAF25), SAM23 (MLBB).

SKILLS

- Programming: Java, Python, JavaScript, SQL (MySQL / MariaDB style), HTML, CSS, MicroPython (Raspberry Pi Pico).
- Frameworks & Libraries: Spring Boot, Express, React, Bootstrap, Java Servlets, JSP
- Tools & Platforms: Maven, Vite, npm, Docker, Docker Compose, Apache Tomcat, IntelliJ IDEA, NetBeans, Visual Studio Code, Thonny, MySQL, MariaDB, phpMyAdmin, XAMPP, Git, Selenium IDE, Selenium, Virtual Paradigm (UML), Cisco Packet Tracer, Kali Linux, Microsoft Project, Weka, ToyyibPay, Raspberry Pi Pico
- Language: English and Malay.
